

The Theory and Practice of Modern Framed Structures Volume 2

Filesize: 8.14 MB

Reviews

The most effective pdf i ever read through. I am quite late in start reading this one, but better then never. Its been developed in an exceedingly simple way in fact it is only soon after i finished reading through this pdf by which in fact altered me, modify the way i think.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1910 Excerpt: .additional equations now required for the four constants are obtained from the condition that the moments and shears at the right end of section A B of Fig. 50 are equal to those at the left end of section B C. The values of these constants will now be determined. From cqs. (5) and (6) the moments and shears for the various sections are given by the following expressions: The conditions from which the independent equations are to be made up. are as follows: Por $x = 0$, $M = 0$ in eq. (4)- $v = 0$, $M = 0$ in cq. (B) $x = k l$, eq. (A) = eq. (B) $x = 0$, eq. (C) = eq. (D). Substituting these conditions in cqs. (A) to (D), the independent equations are found to be $1/8/p$ From these equations, the values of the various constants are given by. $= -c - M Y l$ - C , $-C$, $f - f_8$ (14) When eqs. (4), (5), and (6) are used to calculate deflection, moment, or shear, the proper values of C , and C_2 are to be substituted as determined for the loading in question. Thus for the loading shown in Fig. 50, the deflection, moment, or shear at any point in section A B is found by substituting values of C , and C_2 as given by eqs. (11) and (12). For corresponding values in the unloaded portion B C, the values of the constants are given by $C: i$ and C_2 of eqs. (13)...
