

On the Stabilization of the Trace Formula (Hardback)

Filesize: 9.61 MB

Reviews

Excellent electronic book and helpful one. I could comprehended everything out of this published e book. I discovered this pdf from my i and dad suggested this book to discover.
(Dr. Daphnee Homenick II)

ON THE STABILIZATION OF THE TRACE FORMULA (HARDBACK)

[DOWNLOAD](#)

International Press of Boston Inc, United States, 2011. Hardback. Book Condition: New. 257 x 180 mm. Language: French, English. Brand New Book. This is the first volume of a projected series of two or three collections of mainly expository articles on the arithmetic theory of automorphic forms. The books are intended primarily for two groups of readers. The first group is interested in the structure of automorphic forms on reductive groups over number fields, and specifically in qualitative information about the multiplicities of automorphic representations. The second group is interested in the problem of classifying modic representations of Galois groups of number fields. LanglandsAE conjectures elaborate on the notion that these two problems overlap to a considerable degree. The goal of this series of books is to gather into one place much of the evidence that this is the case, and to present it clearly and succinctly enough so that both groups of readers are not only convinced by the evidence but can pass with minimal effort between the two points of view. More than a decadeAEs worth of progress toward the stabilization of the Arthur-Selberg trace formula, culminating in Ngüiž½ Bau ChouAEs recent proof of the Fundamental Lemma, has made this series timely.
