Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1851 Excerpt: .a plane vertical mirror 4 feet high; what portion of his figure will he see? 3. Given the distance of an image from a double concave lens, and the ratio of the object to the image; required the focal length. How far distant must an object be placed from a plane convex lens, so that its magnitude may be n times that of its inverted image? 5. Place an object before a double convex lens, so that the image may be twice as great as the object and erect. 6. An object is placed at a distance of 4 inches from a concave lens of 2 inches focal length; is the image erect or inverted? 7. Two convex lenses, of 3 inches and 5 inches focal length respectively, are placed on the same axis at a distance of 4 inches from each other; a body is placed at a distance of 6 inches from one of the lenses, determine the position of the image formed by refraction through the combination, and whether it is erect or inverted. VISION. 1. Given the distance at which a shortsighted person can see distinctly; determine the nature of the lens which will enable him to see at any other given distance. 2. A person can see distinctly at the distance of 2 feet, what lens will enable him to see at the distance of 24 feet? 3. A luminous point is placed between two plane mirrors inclined at a given...
